INTERN FRONT-END DEVELOPER

Remote (GMT+1, GMT+2, GMT+3) or onsite (France - Lyon)

Missions

- Build new features within small teams (1-2 fellow front-end developers).
- Learn from senior front-end developers.
- Build new re-usable components that will be used throughout the apps.
- Applications maintenance: bug fix, small improvements.

Profile

- Angular or JS framework experience is a plus.
- 3 to 6 months schooling or self-taught candidates are welcome.
- Eager to learn, curious and open to code review and suggestions.
- Passionate and hardworking, good communication skills with remote co-workers.

Presentation

Company
Cascade8 is the technical backbone of a larger company (Logical Pictures) working in the Cinema industry using blockchain technologies. We are a fast-growing company based in France (Lyon).

Project
We are building a web-based software suite for the cinema industry with a fast production pace (one app every 3 to 6 months). The goal is to connect every stakeholder of a movie life cycle (producer, distributor, financiers, …) around a single source of truth, and automate income sharing.

Team
We are a small remote team (around 15 people, 10 developers) in France, Netherlands, Cameroon and Australia working in the CET time zone. **English is the primary language**. We communicate mainly on slack with a daily standup & bi-weekly sprints.

The stack

- monorepo: nx workspace
- frontend: Angular
- design system: Angular Material
- tests: Cypress
- backend: Firebase
- blockchain: Ethereum
- search engine: Algolia
- CI: Circle CI

The project is open source, here is the link to our repo: https://github.com/blockframes.
